

20 to 25 Aug 2026

Report of 26 Aug 2026 · 6 days · MARSEC Level 2

DWOS_Weekly_Offshore_Logistics_Report_26.08.2026.xlsx (report 22, sheets Port and Vessel), plus Offshore_Logistics_Weekly_Update_26082026_v2.html and the 26.08.2026 email for the rig summaries.

9

Total vessel trips
baseline week

41

Truck / tanker moves
41 counted once each (46
as published)
baseline week

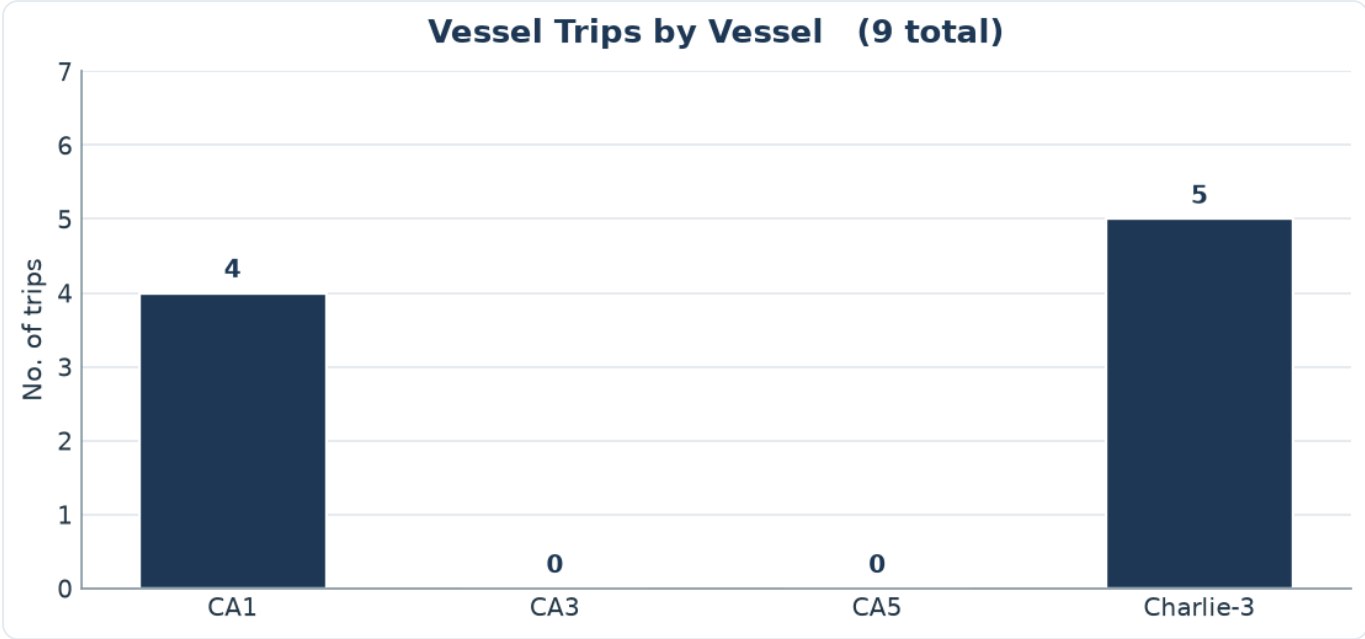

1

Active rig (OD1)
baseline week

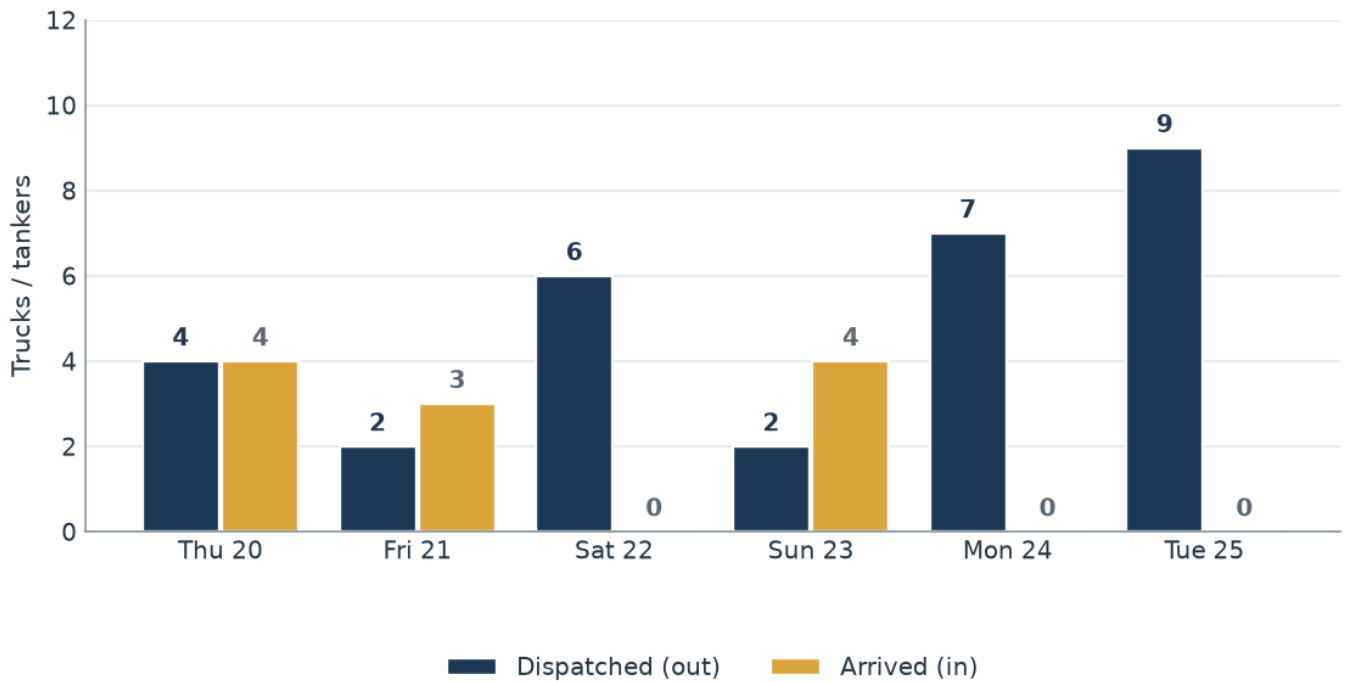

13

Overstay crew
baseline week

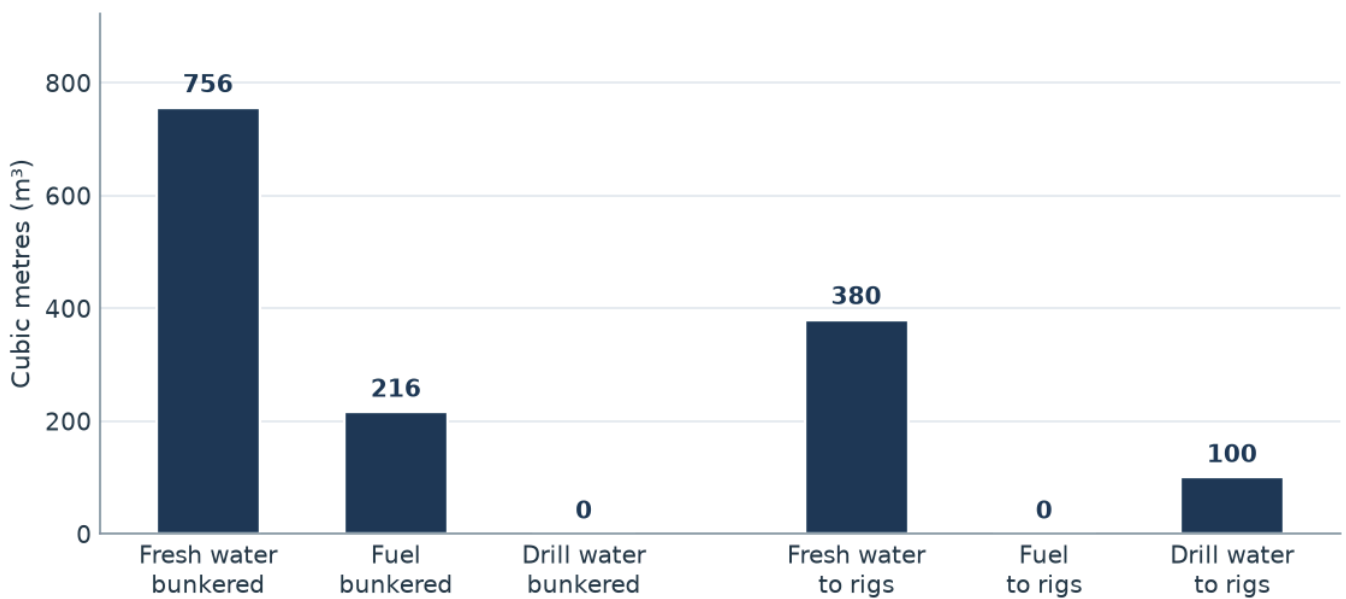

Earliest week in this dashboard, so no comparison is drawn. The 26 Aug 2026 report compared these against 06 to 12 Aug 2026: 16 vessel trips, 68 truck moves, 2 active rigs, nil overstay crew. Truck moves read 41 here against the 46 that report published; see the method note below.

Daily Ground Transport Movements (30 out / 11 in, 41 total)

Fluids & Bulk Managed (1,452 m³ total)

Slops: 320 bbl discharged to vacuum tankers.

Rig OD1 Status

Current operation	Rig preparations for next well
Last week	N/D wellhead sections, install 30" corrosion cap, rig maintenance as plan
Personnel onboard	82 crew (incl. 55 seaman / business visas)
Overstay crew	KOC: Nil HLB: 2 COSL: 11
Next steps	Rig preparation for move; rig move for new well BOUM-0001

Rig OPH Status

Current operation	Rig off-hired
Last week	Nil

Personnel onboard	Nil
Overstay crew	KOC: Nil HLB: Nil COSL: Nil
Next steps	Nil. Backload demobilisation to COSL Mina Abdallah ongoing

Key highlights

- **OD1 completed the wellhead N/D and the 30" corrosion cap installation.** The rig is preparing to move to new well **BOUM-0001**.
- **Overstay crew rose to 13** (HLB 2, COSL 11) from nil the week before. Contractor demobilisation needs follow up with COSL.
- Lower vessel and truck activity follows **OPH being off-hired**, one active rig against two the week before, not a reduction in service level.
- CA1 carried the bulk and cargo programme across 4 trips, including a 52 lift peak offload at Shuaiba on Sat 22.
- Charlie-3 handled all crew changes across 5 trips, including 14 Pax via MM Port on Sat 22, and an 18 in / 8 out change at OD1.
- Ground activity peaked on **Tue 25 with 9 dispatches**, driven by OPH demobilisation: batch mixers, an 18-3/4" annular BOP and DP backloads to COSL Mina Abdallah.
- **4 vacuum trucks of 9.0 ppg contaminated slops** went to MG-0348 and **3 full mud skips** to the NCC SEK plant, loaded Sun 23 and dispatched Mon 24, with no HSE incident. CA1 also transferred 320 bbl of slops to vacuum tankers at Shuaiba.
- Vessel movements remain under **MARSEC Level 2**.

Daily log

► **Port operations** 6 days, 28 operations

► **Vessel movements** 6 days, 24 operations

One trip is one outbound voyage from Shuaiba Port plus its return; a rig to rig transit is not a new trip. A truck move counts one truck unit per dispatch or arrival, and a truck loaded on one day and dispatched the next is one movement, counted on dispatch. Both weeks are counted on that one rule, which is why the previous week reads 41 here against the 46 its own report published.

Rig OD1 Status

Current operation	STBY waiting for BOUM-0001 location clearance
Last week	Cut 38" conductor pipe, install protection structure, release rig to new well BOUM-0001, waiting for BOUM-0001 location clearance
Personnel onboard	75 crew (incl. 53 seaman / business visas)
Overstay crew	KOC: Nil HLB: Nil COSL: 10
Next steps	Rig preparation for move; rig move for new well BOUM-0001

Rig OPH Status

Current operation	Rig off-hired
Last week	Nil
Personnel onboard	Nil
Overstay crew	KOC: Nil HLB: Nil COSL: Nil
Next steps	Nil

Key highlights

- **OD1 cut the 38" conductor pipe and installed the protection structure**, and was released to new well **BOUM-0001**. The rig is on standby and waits for BOUM-0001 location clearance.
- **Overstay crew fell from 13 to 10**. HLB cleared both of its overstay crew. COSL still holds 10 and needs follow up.
- OD1 personnel onboard fell from 82 to 75. 53 of the 75 hold a seaman or business visa.
- **OPH stayed off-hired for a second week**, and demobilisation continued. CA1 discharged 21 lifts at OPH across Tue 01 and Wed 02 Sep.
- Vessel trips held at 9, but the mix changed. CA1 fell from 4 trips to 2. CA3 and CA5 each ran 1 trip after most of the week on station. Charlie-3 again ran all 5 crew change circuits.
- Truck moves also held at 41 on a consistent count, against the 46 the 26-08 report published. Per day the rate fell from 6.8 to 5.1, because this period runs 8 days against the previous 6.
- Ground transport peaked on **Mon 31 Aug with 8 dispatches**, of which six trucks carried empty mud skips to HETCO Mina Abdallah Yard.
- Cut casing joints of 18-5/8", 13-5/8", 10-3/4" and 7-5/8" went to the KOC scrap yard on Sun 30 Aug. The SWT burner boom sections A, B and C moved to TSS-WT Hall Mina Abdallah on Wed 02 Sep.
- Fluids handled fell by about half, 742 m³ against 1,452 m³, and no slops movement is recorded. The port ran day shift only on all eight days.
- Vessel movements remain under **MARSEC Level 2**.

Daily log

► **Port operations** 8 days, 29 operations

► **Vessel movements** 8 days, 32 operations

One trip is one outbound voyage from Shuaiba Port plus its return; a rig to rig transit is not a new trip. A truck move counts one truck unit per dispatch or arrival, and a truck loaded on one day and dispatched the next is one movement, counted on dispatch. Both weeks are counted on that one rule, which is why the previous week reads 41 here against the 46 its own report published.

Overstay crew	KOC: Nil HLB: Nil COSL: Nil

Next steps

Nil

Key highlights

- **OD1 stayed on standby for BOUM-0001 location clearance**, now to start jack-down and move to BM-0001. Last week activities are recorded as Nil: the rig was idle for the full seven days.
- **Overstay crew rose from 10 to 11**, all of them COSL. KOC and HLB are nil.
- OD1 personnel onboard rose from 75 to 79. 57 of the 79 hold a seaman or business visa.
- **Ground transport turned sharply inbound: 32 arrivals against 12 dispatches**, 44 moves in total against 41. The week before ran 35 out and 6 in, so the direction reversed.
- The inbound load is the **BM-0001 move materials**: 18-5/8" and 24" casing and short joints, a casing spool, X-overs, and Fugro positioning tools, from KOC Ahmadi Yard-4 and Yard-5 and HETCO Mina Abdallah. Arrivals peaked on **Wed 09 Sep with 9**.
- **Fluids handled more than doubled, 1,782 m³ against 742 m³**. Fuel delivered to the rigs rose from 200 m³ to 394 m³, of which CA1 transferred 260 m³ on Sun 06 Sep.
- **Vessel trips rose to 13 from 9**, per the covering email: CA1 6, CA3 2, CA5 nil, Charlie-3 5. CA1 carried the increase, working OD1 and OPH through the week. See the data queries on the counting basis.
- OPH stayed off-hired for a third week, and still drew cargo and fluids: CA1 delivered 300 m³ of fresh water and 294 m³ of fuel to OPH across 03 and 07 Sep.
- **Port status reads Normal on all 7 days**, where both previous weeks read Not Normal on every day. The port again ran day shift only.
- Vessel movements remain under **MARSEC Level 2**.

Daily log

► **Port operations** 7 days, 58 operations

► **Vessel movements** 7 days, 28 operations

One trip is one outbound voyage from Shuaiba Port plus its return; a rig to rig transit is not a new trip. A truck move counts one truck unit per dispatch or arrival, and a truck loaded on one day and dispatched the next is one movement, counted on dispatch. Both weeks are counted on that one rule, which is why the previous week reads 41 here against the 46 its own report published.
